

CRRC FOSTER CARE SCHEME

Our Foster Care scheme is to help support you and your pet where a pre-existing medical condition cannot be covered by pet insurance.

FULL FOSTER – The animal would be covered fully by CRRC including medication if necessary (see below for conditions). Vaccinations would be given every three years, additional vaccinations can be given at a cost of £20.00.

PART FOSTER – Only the medical condition that has been diagnosed would be covered by CRRC including medication if necessary and you would need to register with your own vet for all other veterinary treatment and insure against any other medical problems that may occur (see below for conditions).

Please read through the guidelines below and we are happy to give you further details if required.

- Any animal that may need veterinary treatment will need to visit our vet here at the Centre – please consider travelling time
- Visits are currently restricted to one morning per week normally being a Tuesday however due to the current situation (COVID19) visits are being carried out on a Thursday morning unless there is a condition of a more serious nature and then we will accommodate these animals at our own local vet practice
- We are unable to cover costs at another veterinary practice
- We do not provide an out of hours emergency service
